Re: Trump Tax Plan Is Boon to Wealthy

The GOP-Trump tax plan is a massive handout to giant banks, hedge funds, multinational corporations, and the rich at the expense of most of the rest of us.

The notion that providing permanent tax breaks to the top one percent and corporations will spur economic growth and trickle down to the middle class has been repeatedly debunked. Record corporate profits earned since the Great Recession have not translated into higher wages.

Eliminating tax breaks used by millions of middle class families, including home mortgage, state and local tax, and medical expense deductions, to pay for eliminating the estate tax for the ultrarich will only exacerbate wealth inequality.

By blowing a \$1.5 trillion hole in the deficit, the plan will deprive the government of resources to make critical improvements to infrastructure and pave the way for cruel cuts to Medicare, Medicaid, and, potentially, Social Security.

We can defeat this bill, but only if Congress hears from us: Call your Member of Congress today.
